

VIJAYARAGAVAN S				
09/05/2005				
M. Kumarasamy College of Engineering				
Electrical and Electronics Engineering 2026				
2/6, Near Post Office, Velliyanai, Karur-639118.				
Degree	Board	Institute	CGPA %	Year
B.E.	Autonomous	M. Kumarasamy College of Engineering	6.7	2026
Class XII	State Board	S.K.V Matric Higher Secondary School	60.5	2020
Class X	State Board	S.K.V Matric Higher Secondary School	52.8	2020
Bajaj Engineering & Skills Training (BEST)				
Pursuing Bajaj Engineering Skills Training at SASTRA University, Thanjavur.				
- BEST GTE-4 months fully residential program. - Industry relevant curriculum: 70% practical & 30% theory. - This training it has world class Electronic System Reliability.				
ACADEMIC ACHIEVEMENTS				
Presented a project titled “An Ultralow power wearable vital sensor using PPG Sensor at Dr. Kalam Young Achievers Award.				
Awarded 2nd Prize in an inter-college competition for developing an ultra low power wearable device to monitor vital signs, leveraging IoT technology and Photoplethysmogram (PPG) sensors for real-time health tracking.				
Awarded a certificate for "Embeded System" 2024.				
INTERNSHIPS (15 days)				
INTERN	Chettinad Cement Corporation Pvt. Ltd., Puliur,Karur.		25/06/2025 – 09/07/2025	
Responsibilities	- I gained experience in transformer operations and the Motor Control Unit, enhancing my knowledge of industrial electrical systems and equipment maintenance. - Worked with industrial motors, drives, and control panels to understand real-time operation and maintenance procedures			
LIVE PROJECTS				
AIML based project to find cardiac arrest	Develop a machine learning model to predict the likelihood of cardiac arrest using patient data, which can assist clinicians in timely intervention.			
ACADEMIC-PROJECTS				
An Ultralow power wearable vital sign sensor using PPG Sensor	Developed an ultralow power wearable device using a PPG sensor for real-time monitoring of heart rate and SpO₂ levels.			
Thermal Management in EV	Design and analysis of an integrated thermal management system for electric vehicles to ensure optimal temperature control of batteries, motors, and power electronics.			
Leveraging AI for Real-Time Safety and Navigation Support for Visually Impaired Railway Passengers	Developed an AI-based assistive system for visually impaired railway passengers to provide real-time navigation and safety alerts.			
MISCELLANEOUS				
Course	- Completed a ‘JAVA Programming’ course certified by Externs Club , 2025. - Completed a ‘Python for Data Science, AI & Development ’ course certified by Coursera, 2025.			

AutoCAD	• Skilled in 2D drafting; familiar with basic 3D modeling for visualizing engineering designs.
MAT LAB	• Experience in developing and simulating models using Simulink for control systems and power electronics applications.
